## Executive summary

The lifecycle of the Acme-SF project just started. Thus, it is currently in its first stages: the repository has recently been set up and minor changes have been made. Most of the time spent in this deliverable was for having the first contact with the technologies asked, preparing the workspace, analyzing the WIS requirements and fulfilling the required documentation.

## Revision table

Number	Date(dd/mm/yyyy)	Description
1.0	15/02/2023	Document done in its entirety, reviewed by peers. No major errors were found.

## Introduction

The purpose of this document is to provide a detailed planning and progress report of the first delivery of the project “Acme-SF-DO1”, for the subject “Design and Testing 2”. This is divided into two chapters: planning (specifying the requirements set for this delivery, assignees, roles, planned time, actual time, budget estimation...) and progress (assignees performances, conflicts arisen, actual cost in contrast to the estimations...). This document has an executive summary, a revision table where there are versioned records, this introduction, the main content (divided in a planning, and a progress chapter), and the conclusions of the report.

## ● Progress

### ○ Progress records

Juan Garcia Carballo, Ratio:1, is the best value possible, because he has completed all the task assigned.

Marco Antonio Arnáiz Montero: I received a 1 which is the best value because I have completed all my tasks in an effective way.

Caballero María, Pablo: The ratio between the completed tasks and the assigned tasks was 1, meaning that all the tasks were completed.

Alfonso Luis Alonso Lantarán Performance indicator:1, is the best value possible, because I have completed all the task assigned.

According to the performance indicator specified in the chartering report, this performance is considered “good” for each member, so all of them will be able to choose their roles for the next deliverable.
